 Juan Manuel Rivera / jrivera@vilanova.cat i Josep M<sup>a</sup> Ranchal / jranchal@vilanova.cat

SoCaTel will create, implement and pilot a platform which will facilitate an age-friendly environment for older people wishing to age well at home using the following iterative phases.

Co-created and piloted in four member States of the European Union providing access to, information on and responses to a range of state funded models of long-term care.

Budget 3.809.402,00 €

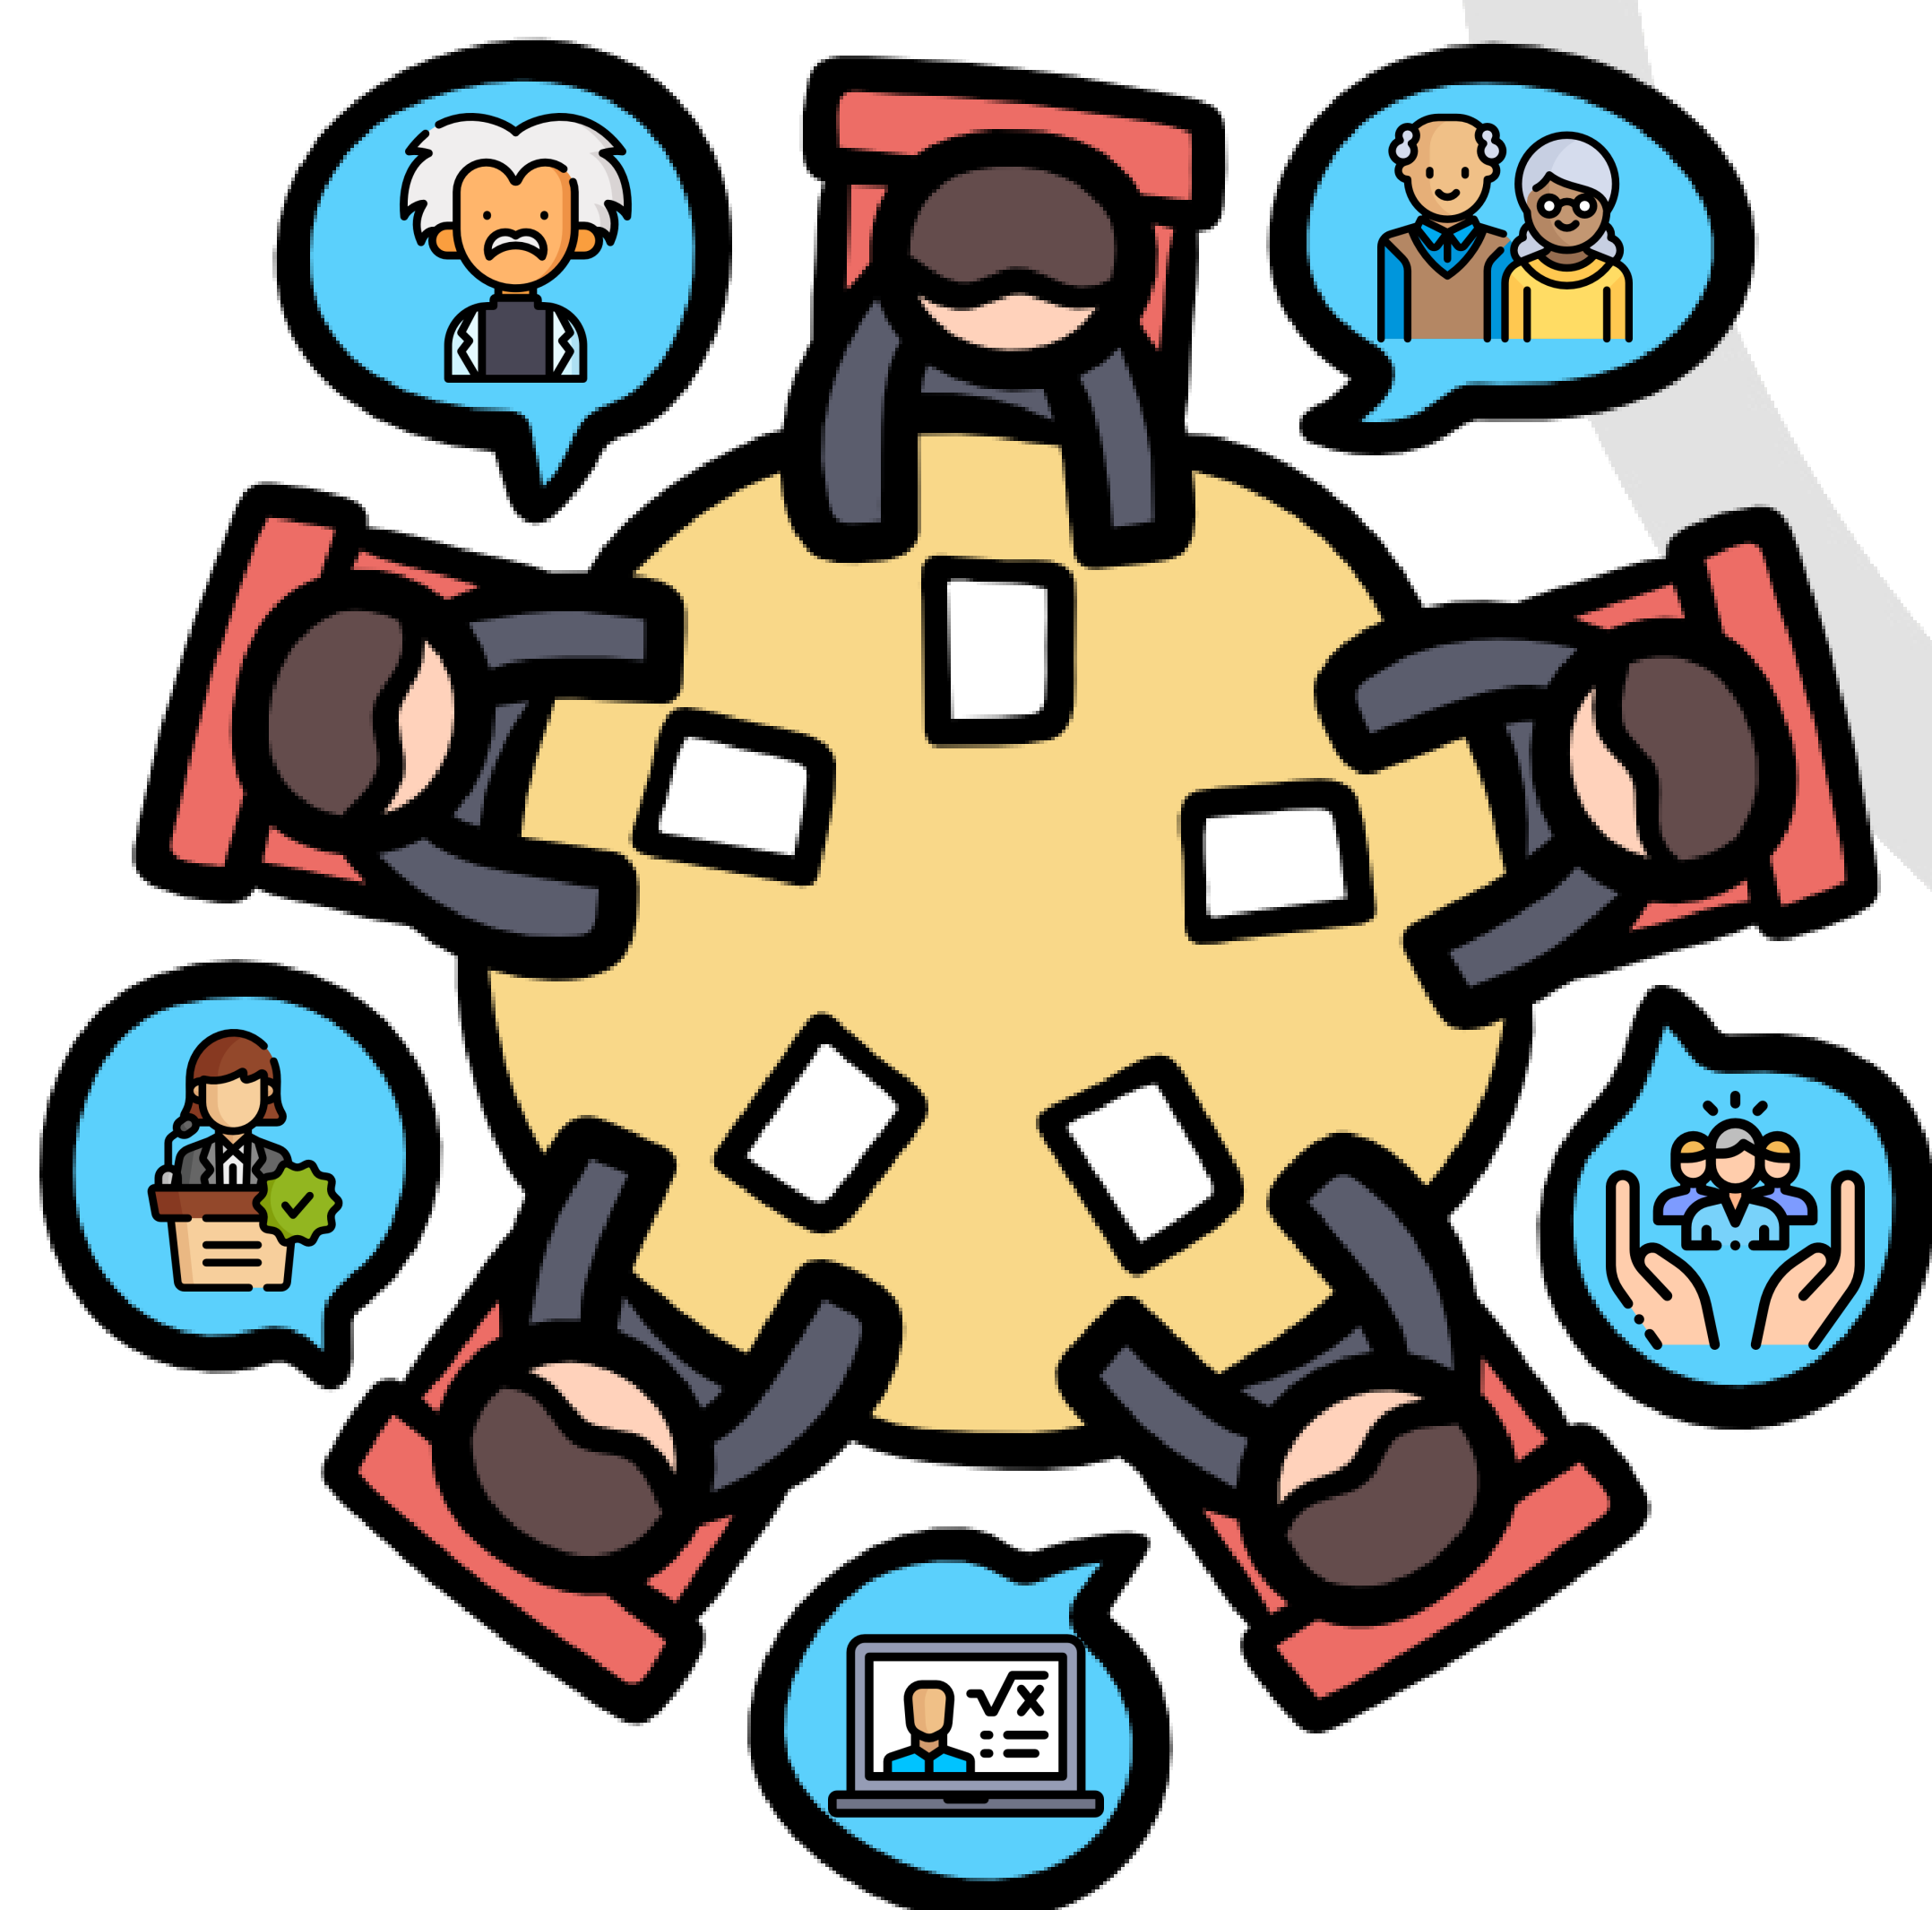

### Aims/objectives

- Understanding the needs of older people within their communities through dialogue and observation.
- Promoting citizenship participation in designing evidence based social support services.
- Improving services by promoting access, responsiveness and cost-efficiencies.
- Promoting an intuitive and user friendly digital environment to respond to the needs of older adults.

### Methodology

The Co-creation method allows citizens to identify and express their needs and acknowledges their right to choose the optimum environment in which to age well.

Using a Quintuple Helix (QH) framework service users, professionals from the public sector, researchers, innovators and policy makers will continually collaborate throughout the process.

### Expected results

- Reduction in the experiences of isolation in older people.
- Adequate support provided to informal Caregivers.
- Older people continually involved in the improvement and implementation of support services.
- Reduction in ageism and participation of Citizens care and support of older people.
- A European Union which promotes co-designed and person centred public services, improve the overall quality of life of it's citizens.
